SUMMARY

I have a degree in Mechanical Engineering, a diploma in Systems Analysis and Development.

After a recent career transition, I have gained one year of experience as a developer, during which I developed skills in creating responsive web pages, applying concepts such as mobile-first and clean code. I also worked with API consumption, data manipulation in JSON, and managing and hosting websites on WordPress.

My knowledge includes HTML, CSS, JavaScript, React, Vite, TailwindCSS, Node.js, PHP, Postman, Bootstrap, WordPress, Git, and GitHub, as well as working with databases like MySQL. I have a basic understanding of SEO and metrics, using GTM and GA4.

My experience also includes using tools like Photoshop, Illustrator, Figma, Trello, Slack, and Notion, as well as agile management practices with Scrum and Kanban.
